Finishes

# Finishes

Essential to all our high performance systems is our full range of finishing products

## Finishes

Gyproc's range of finishes provide everything needed to complete the wall lining, partition, floor and ceiling systems, regardless of the size and complexity of the project specification.

Plaster skimming to plasterboard is a popular method of providing a smooth, seamless surface ready to receive decorative treatment.

Alternatively our jointing materials produce durable joint reinforcement and a smooth, continuous, crack-resistant surface ready for priming and final decoration.

The range of boards available for tiling offers flexibility of design and peace of mind when installed in both wall linings and lightweight partition systems.

To relieve flat runs of lining, joints and angles, and to enhance walls and ceilings, a variety of decorative effects are available which can be installed simply and quickly.
