

Saint Gobain Construction Products (Ireland) Ltd. are required to submit an AER (Annual Environmental Report) each year under their IED Licence P0519-03 (Industrial Emissions Directive) issued by the Environmental Protection Agency (EPA)

What is an AER?

An Annual Environmental Report is an end of year report that summarises the environmental performance of the company. It is a legal requirement to submit this AER by the 31st March each year to the EPA. Part of this AER is the submission of a PRTR (Pollution Release and Transfer Return) which is an inventory of all environmental emissions and wastes produced from site operations.

What is reported in the SGCPPI AER?

Environmental performance on key indicators such as:

- Emissions to air
- Stormwater emissions to receiving waters
- Environmental Complaints and Incidents (if any)
- Waste management and shipments
- Bund and pipeline integrity testing
- Noise and Vibration monitoring
- Water & Energy use and efficiency
- Impacts on groundwaters and land
- Environmental Targets and Objectives for the past and coming year

Saint Gobain Construction Products Ireland (SGCPPI) Performance:

SGCPPI have a high level of compliance with IED licence P0519-03. All past AER and environmental data relevant to the site can be found at www.epa.ie

A dedicated Environmental Management team and an ISO14001 accredited environmental management system (EMS) allow for controlled site operations that reduce negative impacts on the environment.

All environmental related queries, non-compliances and, if the occur, complaints are investigated by our Environmental Management team to identify root cause and implement Corrective and Preventative Action (Action) to address the issue and prevent recurrence.
