

Saint-Gobain Construction Products (Ireland) Ltd is the market leader in plasterboard and plaster manufacturing in Ireland. Saint-Gobain Construction Products (Ireland) Ltd will implement the requirements of ISO 50001 at the process site in Kingscourt for plaster and plaster board manufacturing and use the tools within the ISO 50001 and WCM systems to continually improve our energy performance.

It is our policy to:

- Achieve and maintain the highest standards in energy performance throughout the company and in all our activities through setting solid energy objectives and targets.
- Identify opportunities in order to minimise energy consumption and maximise energy efficiency. Support for the purchase of energy efficient product & services and design for energy performance improvements.

We are committed to ensuring:

- Energy efficiency is a core business value
- Continual improvement in energy efficiency and performance
- Comply with all legal requirements and other requirements related to energy efficiency, energy use and energy consumption as well as Saint Gobain policies and standards relating to energy management.
- Provide all necessary resources and information needed to achieve the energy objectives and targets.

We will routinely set and review achievement of specific objectives and targets for the continual improvement of energy efficiency and commit to the improvement of our Energy Management System.

We will use appropriate training, involvement, development and communication with all our employees and other relevant parties to actively promote:

- Awareness of the **energy policy**
- Achievement of the **objectives and targets programme**
- Awareness of **energy aspects**,
- Responsibility towards **energy usage**,
- Understanding of **energy efficiencies**.

We will devote sufficient resources to ensure that this policy is implemented throughout the company.

Kieran Holohan
Managing Director
