

TIMBER INTERNAL WALL LINING

ENERGY EFFICIENT

FIXING STRENGTH

DURABILITY

SOUND PROOFING

Gyproc plasterboards offer high quality, high performance linings for internal walls.

The addition of our revolutionary plasterboard, Gyproc Habito, offers enhanced sound insulation, impact resistance and for the first time, fixing capability.

Installation

50mm Isover Acoustic Roll is placed between the timber studs and then the 12.5mm Gyproc Habito is fixed to each side of the timber frame using Gyproc High Performance Drywall Screws. The board can then be finished with a 2mm final coat of Gyproc Finish Plaster such as Gyproc Skimcoat or Gyproc Carlite Finish.

Components needed

Isover Acoustic Roll

A mineral wool roll providing a high level of acoustic insulation in partitions.

Gyproc Habito

A revolutionary new plasterboard that provides enhanced acoustic performance, impact resistance and direct fixing capabilities, allowing you to hang 15kg from one 5mm woodscrew.

Gyproc High Performance Drywall Screws

Designed for fixing Gyproc Habito plasterboard to metal and timber framing sections.

Gyproc Finish Plaster

Gyproc Skimcoat or Gyproc Carlite Finish are finishing plasters that provide the highest quality aesthetic finish.
